Exhibit 3Re: Layla Jamshid
TSRH # 032974

TO WHOM IT MAY CONCERN:

I have followed the above referenced patient at the Texas Scottish Rite Hospital for Children from the age of four until her discharge from our facility in 1996. She has Cerebral Palsy with spastic triplegia and has undergone several surgical procedures. She is non-ambulatory and uses an electric wheelchair for mobility.

Due to Layla's decreased hand function, she will require extra time for exams and will need to be allowed to tape lectures. She also will need a table that is wheelchair accessible.

Sincerely,

John A. Herring, M.D.
Chief of Staff
